ABSTRACT

The Federal Government provides substantial funding for education well beyond programs operated by the Department of Education (ED). Total federal support for education in fiscal year 1989 is estimated at \$57.9 billion, an increase of \$18.8 billion, or 48 percent, since 1980. After adjustment for inflation, federal education funds decreased 0.7 percent between FY 80 and FY 89. Of the estimated \$330.5 billion spent on education in FY 89, federal funding amounted to \$35.1 billion (11 percent) and funding from other sources amounted to \$295.4 billion. For FY 89, estimated on pudget federal funds for education program support were \$46.7 billion, an increase of 36 percent for current dollars, but a decrease of 9 percent since 1980 after adjusting for inflation. Funds for off-budget support (mostly postsecondary education loans) were estimated at \$11.2 billion, a rise of 56 percent between FY 80 and FY 89 in constant dollars, and 133 percent in current dollars. Between FY 80 and FY 89, after adjusting for inflation, Federal program funds for educatio for elementary and secondary education declined 17 percent; postsecondary funds declined ?7 percent; other education funds increased 38 percent; and funds for academic research at higher education institutions increased 36 percent. Federal runding for education rose dramatically between FY 65 and FY 75, reflecting sharp increases in programs at all education levels. In FY 89, ED outlays totalled \$20.6 billion, an increase of 5 percent from FY 80. The estimated federal share of education institution expenditures declined from 14 percent in FY 80 to 11 percent in FY 89. About 61 percent of total federal education support went to education institutions in FY 89. Nine tables and two charts are included and six +ables are appended. (MLH)

Federal Funds for Education, Fiscal Years 1980 to 1989

Highlight.

the Federal covernment provides substantial funding for education well beyond programs operated by the Department of Education (ED). Total Federal support for education in 11° al year (FY) 1989 is estimated at \$57.9 billion, an increase of \$18.8 billion, or 48 percent, since 1980. After adjustment for inflation, Federal funds for education decreased 0.7 percent between FY 80 and FY 89 (see tables 1A and 1B, page 6).

- It is important to note that schools and colleges derive only about 11 percent (FY 89) of their revenues from the Federal government, with the remaining revenues coming from State and local governments, individuals, and private organizations. Of the estimated \$330.5 billion spent on education in FY 89, Federal funding amounted to \$35.1 billion and funding from other sources amounted to \$295.4 billion (see tables 9A and 9B, pages 20 and 21)
- For FY 89, estimated on budget Federal funds for education were \$46.7 billion for program support—an increase of 36 percent for current dollars but a decrease of 9 percent since FY 80 after adjusting for inflation Funds for off-budget support (which is predominantly postsecondary education loans) were estimated at \$11.2 billion, a rise of 56 percent between FY 80 and FY 89 in constant dollars and 133 percent in current dollars (see tables 1A and 1B, page 6)
- Between Fi 80 and FY 89, after adjusting for inflation, Federal program funds for elementary and secondary education declined 17 percent, postsecondary education funds declined 27 percent, other education funds (which includes libraries, museums, cultural activities, and miscellaneous research) increased 38 percent, and funds for academic research at institutions of higher education increased 36 percent (see table 2B on page 8)
- Federal funding for education rose dramatically between FY 65 and FY 75, reflecting sharp increases in both elementary and secondary education and postsecondary education programs. Elementary and secondary education rose by 134 percent between FY 65 and FY 70, and a further 23 percent by FY 75, after adjustment for inflation. Postsecondary programs rose by 125 percent between FY 65 and FY 70 and by 47 percent between FY 70 and FY 75. Between FY 75 and FY 80, Federal funding for these two program areas showed only small changes (see table A in appendix, page 29).

- o In contrast to the rapid rises in elementary and secondary and postsecondary education programs between FY 65 and FY 70, Federal funding for university resea is declined 2 percent between FY 65 and FY 70 and increased only 1 percent between FY 70 and FY 75, after adjustment for inflation. College research funding rose about 14 percent between FY 75 and FY 80 (see table A in appendix, page 29)
- In FY 89, (ED) outlays totaled \$20 6 billion, reflecting an increase of 5 percent from FY 52, af adjustment for inflation. During this period, ED's share of total Federal on-budget education support also rose from 38 percent to 44 percent (see chart 1, page 3)
- The estimated Federal share of the enditures of education institutions declined from 14 percent in FY 80 to 11 percent in FY 89, resulting in a proportionate increase in funding from other sources. Among the elementary and secondary education institutions, the Federal share declined from 12 to 8 percent, and at institutions of higher education, the Federal share declined from 18 to 15 percent (see tables 9A and 9B, pages 20 and 21.)
- About 61 percent of total Federal education support went to education institutions in FY 89. Another 18 percent was used for student support Banks and other lending agencies received about 10 percent and all other recipients, including libraries, museums, and Federal institutions, received the balance of about 12 percent (see table F in appendix, page 43)
- In FYs 80, 88, and 89, Federal support was distributed across levels and other educational purposes as follows (see chart 2, page 5, and table A in aprendix, page 29)

Introduction

This report provides a comprehensive picture of total Federal financial support for education for fiscal years 1980 through 1989. The appendix tables in the back of this report, however, have additional data for fiscal years 1965, 1970, and 1975. In order to account for all Federal support for education, programs having significant educational components are included, even if they have additional purposes (see tables A and C in appendix)

Assembling data on Federal funds for education is complex for a number of reasons. First, Federal education programs are found in dozens of Federal departments and agencies. Although some consolidation of education programs in one Federal agency was achieved with the establishment of the U.S. Department of Education in 1980, many large and significant Federal education programs are outside of ED. To get a more complete account of Federal support for education, the education support from all Federal agencies has been included

A second complicating factor is that many Federal programs involving education have other primary concerns. For example, education-related programs range from cultural activities conducted in this country and abroad to some major training institutions, such as the Foreign Service Institute and the FBI Academy. Also, a variety of problems ranging from poverty to helping veterans are addressed, in part, through Federal education programs.

Third, the off-budget support is sometimes overlooked or misunderstood. These off-budget amounts are non-Federal support which are raised as a result of Federal legislation (see page 12).

The fourth consideration is estimated Federal tax expenditures, which in this report include only losses in tax revenue incurred by the Federal government because of education deductions to income allowed by Federal tax provisions. Education programs can be supported either by direct funding or by indirect funding mechanisms such as tax expenditures

It is also important to note that FY 89 data are all estimated and will be revised later for all Federal departments and agencies including the Department of Education. These estimated FY 89 outlays are from various Federal agencies and the U.S. Office of Management and Budget, Budger of the U.S. Government, Appendix, Fiscal year 1990.

To the extent possible, outlays were used in this report rather than obligations, with the exception of academic research at institutions of higher education. Outlays are the actual amount of dollars spent. Obligations are spending commitments by the Federal government that will require outlays either immediately or in the near future

¹ Some data have been revised

Federal support for education falls into three categories on-budget support, off-budget support, and Federal tax expenditures.

- $1. \quad \hbox{On-budget Federal support is provided through programs funded by annual Congressional appropriations}$
- Off-budget Federal support is generated by Federal legislation that provides loan guarantees and implicit subsidie to support loan capital raised through private sources and institutions of higher education generated by Federal programs. Although off-budget programs are excluded from on-budget totals by law, a contingent Federal financial responsibility exists for most of these funds in the form of Federal guarantees for student loans made by banks and public lending institutions and by Federal matching grants to institutions of higher education and States. Almost all off-budget education support goes to postsecondary education.
- 3. Federal tax expenditures are revenue losses attributable to provisions of the Federal tax laws that allow a special exclusion, exemption or deduction from gross income or which provide a special credit, a preferential rate of tax, or a deferral of tax liability. An example would be charitable contributions to educational institutions.

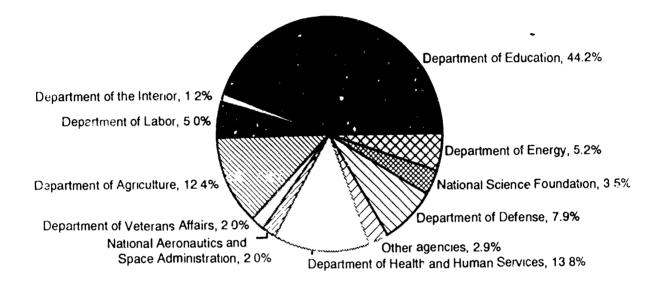

This report also shows current and constant dollar comparisons, based on the composite deflator from the U.S. Office of Management and Budget, Historical Tables, Budget of the U.S. Government, Fiscal Year 1990. The inflation index rose 49.1 percent between FY 80 and FY 89. Additional technical information appears in the Sources and Methodology section.

The National Center for Education Statistics (NCES) intends to publish an annual report on Federal funds for education. Other reports on Federal funds for education that have been published through the U.S. Department of Education are Estimating Federal Funds for Education: A New Approach Applied to Fiscal Year 1980, Office of Planning, Budget, and Evaluation; "Federal Support for Education, Fiscal Years 1980 to 1984" "Federal Support for Education, Fiscal Years 1980 to 1988", NCES, and Digest of Education Statistics, Chapter IV, various years, NCES.

This bulletin has received extensive reviews by individuals within and outside the Department of Education. The author gratefully acknowledges their time and expert advice. Within the Office of the National Center for Education Statistics, there were Thomas D. Snyder, Mary J. Frase, Peter S. Stowe, and William J. Fowler, Jr. Within the Office of Planning, Budget, and Evaluation, there were Neil C. Nelson, Faye Tavernier, and Maurice Stewart. Outside reviewers were Jay Noell from the Congressional Budget Office, Wilbur Turner from the Department of Veterans Affairs, and Barry White from the Office of Management and Budget.

Chart 1.--Distribution of Federal on-budget funds for education, by agency: Fiscal year 1989

Total = \$46 7 billion

SOURCE US Office of Management and Budget, Budget of the US Government, Appendix, Fiscal year 1990, and National Science Foundation, Federal Funds for Research and Development, Fiscal years 1987, 1988, and 1989

Social Security Benefit programs The Department of Labor (DOL) provides for classroom training and other programs through the Job Training and Partnership Act, including the Job Corps program. These programs provide basic literacy and vocational skills training for educationally and economically disadvantaged youths. The Department of the Interior (INT) provides funds for education and welfare services for Indians through the Johnson-O'Malley Assistance and the Bureau of Indian Affairs schools programs. The Department of Veterans Affairs (VA) funds vocational and job training programs for service persons and veterans and also provides services to children and spouses of veterans through the Veterans Job Training Program and Readjustment Benefits programs

Postsecondary Programs, On-Budget

The Department of Education was the primary provider of funds for postsecondary education (excluding research), spending \$9.6 billion, or 81 percent of 'he \$11.9 billion spent on postsecondary education in FY 89. largest Federal programs in postsecondary education are ED's Student Financial Assistance and the Guaranteed Student Loans programs. The Guaranteed Student Loans program includes only special allowances to the lender and in-school subsidized inteest payments and payments for loan defaults. The funds made available through non-Federal organizations as a result of these programs are included under off-budget support. The Department of Defense (DOD), the second largest provider of funds to postsecondary education, provides funds for tuition assistance for military personnel, operation of service academies, the Senior Reserve Officer Training Corps, and professional development The third largest provider, the Department of Veterans Affairs (VA), funds programs for college students who are service persons or veterans and also for children and spouses of veterans. The Department of Health and Human Services (HHS) also supports college education through its Health Training programs

Other Education Programs

"Other" education programs include funds for special institutions, libraries, professional development at specific institutes, and a variety of cultural activities conducted in this country and abroad. In iY 89, about two-thirds of these funds came from the Department of Education and about 11 percent came from the Department of Agriculture (USDA)—The largest "other" education program in FY 89 was the Rehabilitative Services and Handicapped Research program funded through the Department of Education. The Library of Congress, Agency for International Development (AID), and the National Endowment for the Humanities (NEH) also made substantial outlays for "other" education-related programs.

University Research

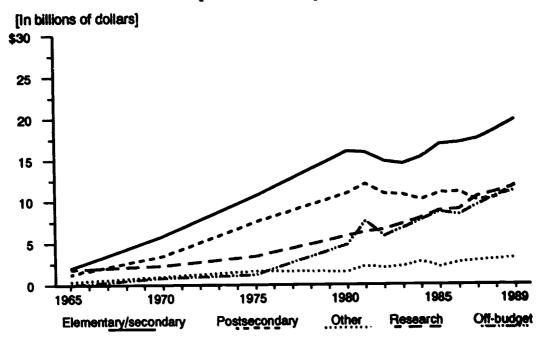

The Department of Health and Human Services funds large amounts of research at universities and university-sponsored research and development centers. HHS expended \$4.4 billion in FY 89, exceeding the research funding of any other Federal department.

The Department of Energy (DOE) and the Department of Defense (DOD) also provide large amounts of funding for research at universities and related institutions. The National Science Foundation (\$1.5 billion) is the only other agency with estimated expenditures for university research exceeding \$1 billion in FY 89 (see table 4 and table C in appendix)

SOURCE: U.S. Department of Education, National Center for Education Statistics, compilations from data appearing in U.S. Office of Management and Budget, Budget of the U.S. Government, Appendix, fiscal years 1982 to 1990; National Science Foundation, Federal Funds for Research and Development, fiscal years 1980 to 1989; and unpublished data obtained from various Federal agencies. (See table A in appendix.)

Federal Program Support for Education, On-Budget

Total Federal education program funds are estimated to be \$46.7 billion for FY 89. After adjustment for inflation, this figure represents a decline of almost 9 percent between FY 80 and FY 89 (see table 2B and table A in appendix). However, Federal program funds generally have increased over the past 6 years, rising by 11 percent between 1983 and 1989, following a decline between 1980 and 1983 (see tables 2A, 2B, and table A in appendix).

Elementary and secondary education programs accounted for the largest share of Federal aid, \$19.8 billion or 42 percent in FY 89. Expenditures for elementary and secondary education programs declined 17 percent between FY 80 and FY 89 in constant dollars, but showed the same pattern of decreasing in the early 1980s and rising in the later 1980s as did Federal funding overall. Postsecondary education programs received the second largest share of Federal aid, amounting to \$11.9 billion, or 25 percent of total funds in FY 89. In constant dollars, postsecondary education programs showed an even larger decline between 1980 and 1989 (27 percent) than did the elementary and secondary Federal support for research conducted at universities and at university-administered research and development centers accounted for \$11.8 billion, or 24 percent of the total. In contrast to general programs (primarily supporting student loan and grant programs) for postsecondary education, Federal support for research showed an increase of Federal spending in constant dollars of 36 percent between FY 80 and FY 89. The inflation-adjusted amounts for research have increased every year since 1982, except for 1986. The remaining 7 percent of Federal aid, or about \$3.2 billion, is estimated for "other" education programs, which includes libraries, museums, cultural activities, and miscellaneous research. "Other" education programs increased 38 percent from FY 80 to FY 89, after adjustment for inflation. The "other" education program declined slightly in the early 1980s and began rising after 1985 (see chart 2).

SOURCE: U.S. Department of Education, National Center for Education Statistics, compiled from data appearing in U.S. Office of Management and Budget, Budget of the U.S. Government, Appendix, fiscal years 1982 to 1990; National Science Foundation, Federal Funds for Research and Development, fiscal years 1980 to 1989; and unpublished data obtained from various Federal agencies. (See table A in appendix.)

Among Federal agencies, the Department of Education is the principal source of education funds at all program levels except for university research. ED's estimated FY 89 program funds were \$20.6 billion--44 percent of the total (see table 3 and table C in appendix). In terms of spending for research at universities, the Department of Health and Human Services (HHS) provides the most--\$4.4 billion, or 37 percent of the total.

While total Federal program funds for education and related activities declined 9 percent in constant dollars between FY 80 to FY 89, education spending changes varied greatly among Federal departments and agencies. For example, education spending by the Department of Veterans Affairs declined from \$3.5 billion to \$0.9 billion (74 percent) between FY 80 and FY 89, after adjustment for inflation, whereas the National Aeronautics and Space Administration education spending increased from \$0.4 billion to \$2 billion, an increase of 144 percent between FY 80 and FY 89 (see table 3).

Of the 10 largest providers of Federal education program funding, five had an increase in Federal spending, after adjusting for inflation between FY 80 and FY 89. The agencies which showed the largest percentage increases in real dollars were the National Aeronautics and Space Administration (144 percent), Department of Defense (58 percent), and the National Science Foundation (34 percent). The other two agencies that showed increases were the Department of Education (5 percent) and the Department of Energy (2 percent).

SOURCE: U.S. Department of Education, National Center for Education Statistics, compiled from data appearing in U.S. Office of Management and Budget, Budget of the U.S. Government, Appendix, fiscal years 1982 to 1990; National Science Foundation, Federal Funds for Research and Development, fiscal years 1980 to 1989; and unpublished data obtained from various Federal agencies (see table B in appendix).

Elementary and Secondary Programs

About half of the \$19.8 billion spent by the Federal Government on elementary and secondary education came from the Department of Education (ED). Some of ED's major programs in elementary and secondary education are Chapter 1, Grants for the Disadvantaged, Education for the Handicapped, Chapter 2, School Improvement Programs, Impact Aid, and Vocational and Adult Eeducation. The Department of Agriculture (USDA), the second largest provider for elementary and secondary education activities, funds the Child Nutrition program, which is the largest single Federally funded elementary and secondary education program.

Among other Federal agencies with substantial outlays in elementary and secondary education is the Department of Defense (DOD), which operates a large number of schools for children whose parents are stationed overseas or at certain installations in the United States. This Overseas Dependents Schools program is DOD's largest elementary and secondary program. The Department of Health and Human Services (HHS) funds the Head Start program for children who are disadvantaged and also provides support to students under 19 who are covered by

Social Security Benefit programs. The Department of Labor (DOL) provides for classroom training and other programs through the Job Training and Partnership Act, including the Job Corps program. These programs provide basic literacy and vocational skills training for educationally and economically disadvantaged youths. The Department of the Interior (INT) provides funds for education and welfare services for Indians through the Johnson-O'Malley Assistance and the Bureau of Indian Affairs schools programs. The Department of Veterans Affairs (VA) funds vocational and job training programs for service persons and veterans and also provides services to children and spouses of veterans through the Veterans Job Training Program and Readjustment Benefits programs.

Postsecondary Programs, On-Budget

The Department of Education was the primary provider of funds for postsecondary education (excluding research), spending \$9.6 billion, or 81 percent of the \$11.9 billion spent on postsecondary education in FY 89. largest Federal programs in postsecondary education are ED's Student Financial Assistance and the Guaranteed Student Loans programs. The Guaranteed Student Loans program includes only special allowances to the lender and in-school subsidized interest payments and payments for loan defaults. The funds made available through non-Federal organizations as a result of these programs are included under off-budget support. The Department of Defense (DOD), the second largest provider of funds to postsecondary education, provides funds for tuition assistance for military personnel, operation of service academies, the Senior Reserve Officer Training Corps, and professional development. The third largest provider, the Department of Veterans Affairs (VA), funds programs for college students who are service persons or veterans and also for children and spouses The Department of Health and Human Services (HHS) also supports college education through its Health Training programs.

Other Education Programs

"Other" education programs include funds for special institutions, libraries, professional development at specific institutes, and a variety of cultural activities conducted in this country and abroad. In FY 89, about two-thirds of these funds came from the Department of Education and about 11 percent came from the Department of Agriculture (USDA). The largest "other" education program in FY 89 was the Rehabilitative Services and Handicapped Research program funded through the Department of Education. The Library of Congress, Agency for International Development (AID), and the National Endowment for the Humanities (NEH) also made substantial outlays for "other" education-related programs.

University Research

The Department of Health and Human Services funds large amounts of research at universities and university-sponsored research and development centers. HHS expended \$4.4 billion in FY 89, exceeding the research funding of any other Federal department.

The Department of Energy (DOE) and the Department of Defense (DOD) also provide large amounts of funding for research at universities and related institutions. The National Science Foundation (\$1.5 billion) is the only other agency with estimated expenditures for university research exceeding \$1 billion in FY 89 (see table 4 and table C in appendix).

(See table C in appendix.)

Off-Budget Support

Federal support for education extends beyond those amounts included in the To measure the magnitude of the influence of Federal funds on education, one must also take into account non-Federal funds which are made available for education purposes because Federal programs require matching funds The off-budget funding is generated by or offer incentives and subsidies. Federal legislation that provides loan guarantees and implicit subsidies to support loan capital raised through private sources and institutions of higher education. Although off-budget programs are excluded from on-budget totals by law, a contingent Federal financial responsibility exists for most of this support in the form of Federal guarantees for student loans made by banks and public lending authorities. They may result in additional Federal spending and, hence, add to the Federal government deficit, which has to be financed by taxes, borrowing, or other means because of loan defaults and subsidies. education-related, off-budget support occurs in the area of loans for postsecondary students.

The Perkins Loans program (formerly the Direct/Defense Loans), authorized under the National Defense Education Act of 1958, currently has some 3,300 participating institutions that administer the Perkins Loans revolving funds with total assets now exceeding \$5 billion. These funds have been built up through 30 years of Federal capital contributions, with institutions providing one dollar for every nine Federal dollars. The Income Contingent Loans program created by the Higher Education Amendments of 1986 is a demonstration project that currently has a 10-institution limit on participation. These 10 institutions must match Federal capital contributions at the rate of one institutional dollar for every nine Federal dollars. Both the Perkins Loans and the Income Contingent Loans have revolving loan funds, from which new loans are made, and for collecting loans that the institutions are responsible for administering. These institutional matching funds constitute off-budget support.

The State Student Incentive Grant (SSIG) program provides incentives to States to develop State-level, need-based postsecondary student grant and community service work-study programs. Federal funds are matched by State contributions on a dollar-for-dollar basis. Under the Work-Study Program, the Department of Education makes grants to participating institutions that use these funds to provide generally up to 70 percent of the salaries of undergraduate and graduate students working part-time, typically in on-campus jobs. The remaining 30 percent is provided by the school or some other employer. Up to 90 percent of a student's earnings may be from Federal funds if the job is part of a Community Service Learning Project.

Some \$11.2 billion in off-budget funds--dollars that are generated by Federal education programs but do not appear in the U.S. Budget--benefited postsecondary students and institutions of higher education in FY 89. This off-budget support amounted to more than 19 percent of the total Federal support for education. Off-budget support, combined with on-budget postsecondary education programs and university research, amounted to \$34.9 billion in FY 89, or about 60 percent of the total spent on education (see tables 5A, 5B, and table A in appendix).

Under the Guaranteed Student Loans program (GSL), new student loans totaling \$10.9 billion were made in FY 89. The Perkins Loans program accounted for an additional \$20.4 million in low-cost loans to financially needy students, and the Income Contingent Loans program accounted for \$1.1 million. The State

Student Incentive Grant program also provided aid to students with \$72 million in State matching grants in FY 89. Under the Work-Study program, employer contributions to student earnings amounted to about \$170 million.

Estimated Federal Tax Expenditures as Education Support

Federal support for education also comes indirectly through the U.S. tax code. For example, deductions allowed for State and local taxes--major sources of local education funding--on Federal income tax returns affect Federal revenues and are known as tax expenditures by the Federal government. At the same time, tax expenditures reduce the burden of school support on individual taxpayers, mainly taxpayers who itemize. Some of these Federal education tax expenditures are deductions of charitable contributions to educational institutions; exclusions of scholarships, fellowships, and GI Bill benefits from taxable income; personal exemption status on parents' Federal income taxes for dependent students over 19 years of age; and exemption from Federal taxes of interest income from State and local school bonds and student loan bonds.

Altogether, Federal tax expenditures were estimated at \$16.4 billion in FY 88 (in FY 89 dollars), reflecting a decline of 19 percent since 1980, after adjusting for inflation. Although there were fluctuations from year to year during this period, there was a significant drop in FY 88 (see tables 6A, 6B, and table A in appendix). One possible explanation is the Tax Reform Act of 1986, which curtailed tax subsidies in several ways. First, it eliminated or restricted certain deductions and exemptions. Second, increases in the standard deduction have turned many itemizers into nonitemizers, reducing the subsidy value of such items as the deductibility of local school property taxes. And third, marginal tax rates have been reduced, shifting taxpayers into lower brackets and lowering the value of all remaining deductions, exclusions, and exemptions.²

The reason for referring to these subsidies as "tax expenditures" is that the benefits provided by the Federal Government through tax preferences are equivalent to benefits that could be provided in the form of direct Federal outlays for education. This is why Federal expenditures or tax subsidies should be taken into account when assessing the Federal financial support in education.

Table 6.--Estimated Federal tax expenditures for education: Fiscal years 1980, 1987, and 1988 [In billions of current and constant FY 89 dollars]

Estimated Federal tax expenditures	FY 80	FY 87	FY 88	Percent change, FY 80 to FY 88	Percent change, FY 87 to FY 88	
In current dollars	\$13.7	\$19.2	\$15.8	15.4	-17.7	
In constant dollars	\$20.4	\$20.6	\$16.4	-19.4	-20.4

SOURCE: U.S. Department of Education, National Center for Education Statistics, contractor reports by Stephen M. Barro, "Federal Tax Expenditures, FY 1980 to 1984" and "Federal Tax Expenditures, FY 1984 to FY 1988." (See table A in appendix.)

² A more detailed report on tax expenditures will be released through the National Center for Education Statistics (NCES) for publication in the future.

Recipients

Not all Federal education support goes to schools, colleges, universities or other traditional educational institutions. Some goes directly to students (for out-of-pocket expenses), some to banks (to pay interest subsidies on guaranteed loans), some for direct Federal services (such as military academies or overseas dependents' schools), and some for other institutions such as libraries or museums.

Recipients of Federal education support are grouped in the following categories in this report: local educational agencies (LEAs), State education agencies (SEAs), students, institutions of higher education (IHEs), and the Federal Government (FED), which itself is a recipient of Federal education funds when it spends directly for education and related activities, such as military academies, Federal libraries, and Federal schools (see tables 7A, 7B, and tables D, E, and F in appendix). Also tabulated are "mixed" recipients, which is a category used when Federal program funds are available to more than one type of eligible recipient, and "other" recipients, which include Indian tribes, private nonprofit agencies, and banks.

The initial recipient of Federal education funds is frequently not the ultimate recipient of the funds. For example, SEAs apply for and receive Federal aid that they pass on to their LEAs, while much Federal student assistance is channeled through colleges to students who then use it for paying tuition at the same IHEs.

(See tables D, E, and F in appendix.)

Distribution of Federal Education Program Funds and Off-Budget Support

Total Federal education program funds and off-budget support amounted to \$57.9 billion in FY 89. The IHEs received the largest share, followed by LEAs, Students, Other, Mixed, SEAs, and the Federal Government. Federal education funds decreased about 0.7 percent between FY 80 and FY 89, after adjustment for inflation, but there were significant differences among the recipient categories. Funds for LEAs fell by 23 percent after adjustment for inflation, in large part due to the discontinuation of the local revenue-sharing program. The drop in funds for students was affected by the decline in education benefits for veterans and discontinuation of Social Security benefits for postsecondary students (see tables 8A, 8B, and tables D and F in appendix). There was sizeable growth from FY 80 to FY 89 in programs for SEAs and Mixed recipients. This growth was in large measure due to increases in funding for handicapped students and the Department of Labor programs. The amount funded for the Other category rose by 40 percent between FY 80 and FY 89. Most of this funding went to financial institutions to support the Guaranteed Student Loan program.

In FY 89 (see tables 8A and 8B), LEAs received most of the elementary and

secondary education funds, about 22 percent of all Federal education support. Students received the largest portion of support at the postsecondary education level and SEAs received the highest proportion at Other education level. IHEs received the largest portion from research. IHEs were also the largest recipient for Federal support (33 percent). Most of the off-budget support went to college students and IHEs.

In FY 89 (see table F in appendix), ED was the largest provider of funds for LEAs, SEAs, and Other recipients. The largest provider for Students was off-budget programs administered by the Department of Education. The largest provider for IHEs was the Department of Health and Human Services; for the Federal Government, the Department of Defense; and for the Mixed category of recipients, the Department of Labor.

Federal Education Support for Education Institutions

Total expenditures by public and private elementary and secondary schools and institutions of higher education from all sources (Federal, State, and local governments, and private) rose from \$258.6 billion in FY 80 to an estimated \$330.5 billion in FY 89, an increase of 28 percent, after adjustment for inflation (see table 9B). Federal education support going to these institutions, including off-budget aid and support for research, increased by 0.4 percent during this period, from \$35 billion to \$35.1 billion. Federal education support going to elementary and secondary institutions declined 14 percent between FY 80 and FY 89; however, Federal support to higher education institutions increased 16 percent during the same time (in constant dollars). Because of the rise in expenditures of education institutions, the proportion of funding from Federal sources declined from 14 percent in FY 80 to almost 11 percent in FY 89. For FY 88 and FY 89, however, the share of Federal support increased.

The Department of Education (ED) was the largest source of Federal support for LEAs and SEAs. SEAs received 78 percent of their Federal education aid from ED, while LEAs received 57 percent. Most of the rest of the Federal support for LEAs (40 percent) came from the Department of Agriculture (see table F in appendix).

Estimated institutional expenditures for IHEs increased 35 percent between FY 80 and FY 89, after adjustment for inflation. During this period, Federal program support for IHEs, after adjustment for inflation, increased about 16 percent and off-budget support for IHEs increased 56 percent. Because of the rise in expenditures of higher education institutions, the share of funding from the Federal government dipped from almost 18 percent in FY 80 to almost 15 percent in FY 89.

The Department of Health and Human Services and the Department of Education were the largest providers of Federal support for IHEs, accounting for 23 percent and 18 percent, respectively, of the Federal education aid in FY 89. Other major sources of Federal education aid for IHEs were off-budget, 19 percent; Department of Energy, 13 percent; Department of Defense, 11 percent; and the National Science Foundation, with 8 percent. IHEs also received their Federal funds from the largest number of different departments and agencies, minimizing their dependence on any one.

³U.S. Department of Education, NCES, Digest of Education Statistics, 1990. ⁴These Federal amounts differ from those reported in other NCES reports from the Common Core of Data and Financial Statistics of Institutions of Higher Education surveys. For further discussion, see methodology section.

Excludes Federal tax expenditures.

NOTE: This table includes only the Federal support passed through local education agencies, State education agencies, elementary and secondary institutions, and postsecondary institutions. Federal programs that do not support regular educational institutions are not included. Examples would be Federal support for libraries, museums, military schools, and cultural activities. Additionally, the Federal contributions to education through tax expenditures are not included on this table. Such payments would add substantial amounts and several percentage points to the Federal share. Percentages are based on unrounded numbers. Data for institutional expenditures are for the academic year ending in the fiscal year indicated. Data for institutional expenditures are adjusted by the Consumer Price Index and data for Federal funds are adjusted by the Federal funds composite deflator. Because of rounding, details may not add to totals.

² Estimated

³ Non-Federal support generated by Federal programs.

SOURCE: U.S. Department of Education, National Center for Education Statistics, derived from Common Core of Data and Financial Statistics of Institutions of Higher Education surveys; and compilations from data appearing in U.S. Office of Management and Budget, Budget of the U.S. Government, Appendix, fiscal years 1982 to 1990; National Science Foundation, Federal Funds for Research and Development, fiscal years 1980 to 1989; unpublished data obtained from various Federal agencies; and U.S. Department of Education, Office of Planning, Budget and Evaluation, unpublished data (see tables D, E, and F in appendix).

Sources and Methodology

Data for U.S. Department of Education programs came from the Appendix to the Budget of the U.S. Government, FY 1967 to 1990 editions. Budget offices of other Federal agencies provided information for all other Federal program support except for research funds, which are obligations reported by the National Science Foundation in Federal Funds for Research and Development, fiscal years 1965 to 1989. All FY 89 data, including the Department of Education's, were estimated. The estimates are from the Federal agencies contacted and the Appendix to the Budget of the U.S. Government, 1990.

Except for money spent on research, outlays were used to report program funds to the extent possible. (ED totals exclude deductions for offsetting receipts.) Some Federal program funds not commonly recognized and education assistance are also included in the totals reported. For example, portions of Federal funds paid to some States and counties as shared revenues resulting from the sale of timber and minerals from public lands have been estimated as funds used for education purposes. Parts of the funds received by States (in 1980) and localities (throughout the period) under the General Revenue Sharing Program are also included, as are portions of Federal funds received by the District of Columbia. The share of these funds allocated to education was assumed equal to the share of general fund expenditures for elementary and secondary education by States and localities in the same year as reported by the U.S. Bureau of the Census in its annual publication, Governmental Finances.

All State intergovernmental expenditures for education were assumed earmarked for elementary/secondary education. Contributions of parent governments of dependent school systems to their public schools amounted to approximately 9 percent of local government revenues and local government revenue sharing in each year. Therefore, 9 percent of local government revenue sharing funds were assumed allocated each fiscal year to elementary and secondary education. Parent government contributions to public school systems were obtained from the U.S. Bureau of the Census, Finances of Public School Systems. The amount of State revenue sharing funds allocated for postsecondary education in 1980 was assumed to be 13 percent, the proportion of direct State expenditures for institutions of higher education reported in Governmental Finances for that year.

The share of Federal funds for the District of Columbia assigned to education was assumed equal to the share of the city's general fund expenditures for each level of education.

For the job training programs conducted by the Department of Labor, only estimated sums spent on classroom training have been reported as educational program support.

In the past, the Office of Management and Budget (OMB) prepared annual reports on Federal education program support. These were published in Special Analyses, Budget of the United States Government. The information presented in this report is not, however, a continuation of the OMB series. A number of differences in the two series should be noted. OMB required all Federal agencies to report outlays for education-related programs using a standardized form, thereby assuring agency compliance in reporting. The scope of education programs reported here differs from OMB. Off-budget items such as the annual volume of guaranteed student loans were not included in OMB's reports. Finally, while some mention was made of an annual estimate of Federal tax expenditures, OMB did not include them in its annual analysis of Federal education support. Estimated

Federal tax expenditures for education are the difference between current Federal tax receipts and what these receipts would be without existing education deductions to income allowed by Federal tax provisions. Federal tax expenditures data are from reports prepared under contract ("Federal Tax Expenditures, FY 1980 to FY 1984, and "Federal Tax Expenditures, FY 1984 to FY 1988") for the National Center for Education Statistics, U.S. Department of Education.

Recipients' data are estimated based on Victor Miller and Jay Noell's Estimating Federal Funds for Education: A New Approach Applied to Fiscal Year 1980, U.S. Department of Education; and Esther Tron's, "Federal Support for Education, Fiscal Years 1980 to 1964"; and the Office of Management and Budget's, Catalog of Federal Domestic Assistance. The recipients data are estimated based on obligations. The recipients' data are estimated and tend to undercount IHEs, students, and LEAs. This is because some of the Federal programs have more than one recipient receiving funds. Some recipients may not even realize that the funds they received are Federal in origin if they are received indirectly, through a third party. Many do not know the name of the Federal department making the payment, especially when one Federal agency makes a payment for another agency or when funds flow through intervening State institutions. some cases the recipients were put into a "mixed recipients" category, because there was no way to disaggregate the amount each recipient received. distributing Federal aid by ultimate recipient must still be indirectly estimated.

Federal education support for education institutions differ in this report from those reported in other NCES reports from the Common Core of Data (CCD) and Financial Statistics of Institutions of Higher Education surveys. An example would be in FY 1980 the CCD survey had reported \$9.5 billion, whereas this report has \$12.2 billion (in current dollars). The Financial Statistics of Institutions of Higher Education survey reported \$8.9 billion, whereas this report has \$11.5 There are a large number of reasons for the differences. institutional surveys count Federal revenues received during the fiscal year of the educational institution (July 1 to June 30) which do not generally correspond exactly to those received during the Federal fiscal year (October 1 to September State education agencies are not included in the CCD and the "Financial Statistics of Institutions of Higher Education" surveys; however, they are included in this report. Some Federal programs are forward funded: funds are appropriated in one fiscal year for spending by educational institutions in In some cases, institutions do not identify Federal money following years. passed through State governments as "Federal" receipts. At the elementary and secondary education level, private elementary and secondary schools and State government-operated institutions such as those for the handicapped are not included in the CCD survey prior to 1989. Some types of Federal financial aid programs, such as GSL and NDSL, are specifically excluded from the "Financial Statistics of Institutions of Higher Education" survey. Off-budget support is Data on Federal support appearing in this report are more also excluded. comprehensive in scope than totals from institutionally-based surveys. For these reasons and a variety of other factors, Federal support data in this report will differ from figures in NCES survey reports.

This report shows current and constant dollar comparisons. The composite deflator from the U.S. Office of Management and Budget, (Historical Tables, Budget of the U.S. Government, Fiscal Year 1990) and the Consumer Price Index from the U.S. Department of Labor, Bureau of Labor Statistics, were used to compute constant dollars. The composite deflator was used in all the tables and

text except for institution expenditures in table 9B and the text related to expenditures for education institutions where the Consumer Price Index was used instead.

The composite deflator and the Consumer Price Index numbers are:

	Composite deflator	Consumer Price Index
1965	0.2996	31.2
1970	0.3841	37.8
1975	0.5671	51.8
1980	0.8453	77.6
1981	0.9335	86.6
1982	1.0000	94.1
1983	1.0430	98.2
1984	1.0808	101.8
1985	1.1138	105.8
1986	1.1415	108.8
1987	1.1703	111.2
1988	1.2103	115.8
1989	1.2600	121.2
		

^{*} The Consumer Price Index is adjusted to a school-year basis (July through June).

Footnotes for Table C

- 1 Estimated.
- 2 The U.S. Department of Education became a department May 1980. It formerly was the Office of Education in the U.S. Department of Health, Education, and Welfare
- 3 These commodities are purchased under Section 32 of the Act of August 24, 1935, for use in the child nutrition programs.
- 4 This program assisted in the construction of public facilities, such as vocational schools, through grants or loans. No funds have been appropriated for this account since FY 77, and it was completely phased out in fiscal year 1984 after the monitoring of closeouts of projects was completed. Data are not available for previous years.
- 5 This program was funded by the Department of Education in FYs 65 through 81 in the "Impact Aid" program. This program provides for education of dependents of Federal employees residing on Federal property in cases where tree public education is unavailable in the nearby community.
- 6 The U.S. Department of Energy became a department in 1977. It formerly was the Energy Research and Development Administration and before that the Atomic Energy Commission.
- 7 This program was established in 1979. Funds were appropriated for this program in FY 80.
- 8 The U.S. Department of Health and Human Services was part of the U.S. Department of Health, Education, and Welfare until May 1980.
- 9 The Head Start program was in the Office of Economic Opportunity Agency, and funds were appropriated to the U.S. Department of Health, Education, and Welfare, Office of Child Development, in 1972.
- 10 After age 18, benefits terminate at the end of the school term or in 3 months, whichever is less.
- 11 This program provides funding for supplemental programs for eligible Indian students in public schools.
- 12 This program finances the cost of academic, social, and occupational education courses for immates in Federal prisons.
- 13 The Job Corps program was formerly in the Office of Economic Opportunity, and funds were appropriated to the U.S. Department of Labor in 1971 and 1972.
- 14 Some of the work and training programs included in this program were in the Office of Economic Opportunity and were transferred to the U.S. Department of Labor in 1971 and 1972.
- 15 The U.S. Department of Transportation became a department in 1967.
- 16 This program was transferred from the U.S Department of the Treasury to the U.S Department of Transportation in 1967.
- 17 This program was established in FY 72 and closed in FY 86.
- 18 The States' share of revenue-sharing funds was not spent on education in FYs 81 through 86.
- 19 The U.S. Department of Veterans Affairs, formerly the Veterans Administration, became a department March 1989

- 20 This program provides educational assistance allowances in order to restore lost educational opportunities to those individuals whose careers were interrupted or impeded by reason of active military service between January 31, 1955, and January 1, 1977. Includes "Readjustment Benefits," Chapter 34, for education other than college and also includes the "Veterans Job Training Program" for service persons and veterans.
- 21 This program is in "Readjustment Benefits" program, Chapter 31, and covers the costs of subsistence, tuition, books, supplies, and equipment for disabled veterane requiring vocational rehabilitation.
- 22 This program is in the "Readjustment Benefitz" program, Chapter 35, and provides benefits to children and epouses of veterans.
- 23 This agency was established March 9, 1985. First year of appropriations was 1986. The outlays were larger in the years 1970 and 1975 for elementary and secondary education because of the construction of facilities for vocational schools.
- 24 This agency was established in 1985. In 1970, \$900,000 were appropriated through the Office of Education, U.S. Department of Health, Education, and Welfare, for the National Endowment for the Arts, Arts in Education program.
- 25 This agency was established in 1965. First year of appropriations was 1966.
- 26 The Economic Opportunity Act of 1964 authorized 10 major action programs, including Job Corps, Neighborhood Youth Corps, Adult Literacy, Work Experience, College Work-Study; and Community Action programs, including Head Start, Follow Through, and Upward Bound, and authorized the establishment of Volunteers in Service to America (VISTA). These programs were transferred to the U.S. Department of Health, Education, and Welfars, U.S. Department of Labor, and the Action Agency in the 1970's. An act on January 4, 1975 established the Community Services Administration as the successor agency to the Office of Economic Opportunity.
- 27 Head Start program funds were transferred to the U.S. Department of Health, Education, and Welfaro, Office of Child Development, in 1972.
- 28 Most of these program funds were transferred to the U.S. Department of Health, Education, and Welfare, Office of Education, in 1972.
- 29 The Job Corps program funds were appropriated to the U.S. Department of Labor in 1971 and 1972.
- 30 These program funds were appropriated to the U.S. Department of Labor in 1971 and 1972.
- 31 These funds were appropriated to the Action Agency in 1972.
- 32 Similar programs were included in the "higher education" program in 1965 through 1975.
- 33 Negative amounts occur when program receipts exceed outlays.
- 34 This program was formerly in the U.S. Department of Housing and Urban Development and was transferred to the U.S. Department of Health, Education, and Welfare, Office of Education, in fiscal year 1979.

- 35 First year of appropriations for this program was 1967
- 36 The first year program funds were appropriated for Tuskeegee (netitute was 1972.
- 37 The Sea Grant College Program Act of 1968 established a matching fund grant program that provides for the establishment of a network of programs in fields related to development and preservation of the coastal and marine resources of the Nation. One of the objectives is to provide trained personnel to utilize a 1 manage these resources. This program was in the National Science Foundation and transferred to the U S Department of Commerce October 1970. Appropriations becam in 1968.
- 38 This program was transferred to the Department of Transportation in FY 81 by Public Law 97-31, from the U.S. Department of Commerce.
- 39 The Department of Defense funds for FYs 88 and 89 are lower than previous years because they exclude military pay and reserve accounts which were included in previous years. FY 65 data are not available except for partice academies.
- 40 included in total above.
- 41 Instructional costs only are included. These include academics, audiovisual, academic computing center, faculty training, military training, physical education, and libraries.
- 42 includes special education programs (military and civilian); legal education program; flight training; advanced degree program; college degree program (officers); and "Armed Forces Health Professions Scholarship" program.
- 43 No funds have been appropriated for this program since FY 82.
- 44 This program receives funds periodically.
- 45 The first year of appropriations for this program was FY 84.
- 46 This program did not exist until FY 76 Money was first awarded in 1978.
- 47 The amount reported in FY 83 was large because of a loan default.
- 48 Postsecondary student benefits were ended by the Omnic Rindget Reconciliation Act of 1981 (Public Law 97-35) and were completely phased out by August 1985.
- 49 Includes adult education, tribally controlled community colleges, and other postsecondary schools.
- 50 This program was transferred to the international Communication Agency (ICA) in the Reorganization Plan No. 2 of 1977, which consolidated the functions of the United States Information Agency (U.S.I.A.) and the Department of State's Bureau of Educational and Cultural Affairs. In FY 82 the ICA became the U.S.I.A.
- 51 This program provides funds for advanced study and research projects of the Soviet Union and Eastern European countries by American institutions of higher education and private research firms. Appropriations began in FY 88.
- 52 This program was transferred to the U.S. Department of Transportation in FY 81 by Public Law 97-31, from the U.S. Department of Commerce. The estimated 1989 outlays are much higher because of the replacement of one of the training ships.

- 53 Includes flight training. This program was in the U.S. Department of the Treasury in 1985 and was transferred to the U.S. Department of Transportation in 1987.
- 54 Includes Vietnam-era veterans under Chapter 34 (GI Bill) of the "Readjustment Benefits" education and training program. This program provides educational assistance allowances, primarily on a monthly basis, in order to restore lost educational opportunities to those individuals whose careers were interrupted or impeded by reason of active military service between January 31, 1955, and January 1, 1977.
- 55 Includes service persons under Chapter 34 (GI Bill) of the "Readjustment Benefits" education and training program. Service persons with over 180 days of active duty, any part of which was before January 1, 1977, are eligible to participate in this program.
- 56 Includes post-Vietnam-era veterans, under Chapter 32, of the post-Vietnam-era "Veterans Education Account." Provides education and training assistance payments to veterane and service persons with no active duty time before January 1, 1977. Funding is provided through participants' contributions while on active duty and through transfers from the Department of Defense (DOD). Participants' contributions, up to a maximum of \$2,700, are deposited to the fund prior to discharge. When the participent enters training, the monthly disbursement from his or her account is matched two for one from funds provided by DOD. Additional amounts in the form of incentive horuses may also he provided by DOD funds. As Veterans Administration funds are not approprieted for this program, these data represent obligations.
- 57 Public Law 98-525, enacted October 19, 1984 (New GI Bill), established two new peacetime educational programs: An assistance program for veterans who enter active duty during the period beginning July 1, 1985, and ending on June 30, 1988, and an assistance program for certain members of the Selected Reserve.
- 58 Chapter 30, also called the Montgomery Bill, and the new Gi Bill are for eligible veterans who have agreed to have their military pay reduced \$100 per month for their first 12 months of active duty in order to participate in this program. The "Readjustment Benefits" account under the Veterans Administration pays only the basic allowance, up to a maximum of \$300 per month, for full ...ne training. "Supplemental Benefits" are paid by the Department of Defense (DOD). Legislation is being proposed to fund the "basic benefit" allowance through the DOD rather than through the "readjustment benefits" appropriation. The Veterans Administration would continue to administer the program.
- 59 Chapter 106 is for members of the Selected Reserve
 The reserve components include the Army, Navy, Air
 Force, Marine Corps Reserve, Army National Guard and Air
 National Guard under the Department of Defense (DOD),
 and the Coast Guard Reserve, which is under the
 Department of Transportation (DOT), when it is not
 operating as a service in the Novy. Eligible persons
 can receive up to \$140 per month for full-time
 training The DOD and DOT pay for this program, and
 the Veterans Administration administers it.

39

- 69 Includes dependents of veterans under Chapter 35, the "Readjustment Benefits" education and training program. Provides education and training benefits to dependents of veterans who died of a service-connected disability or whose service-connected disability is rated permanent and total.
- 61 These payments have been made to State education agencies for years but they were not available as a separate budget item until FY 88.
- 62 The U.S.I A. was called the "International Communication Agency" in FYs 80 and 81
- 63 This program was in the "Educational and Cultural Affairs" program in FYs 80 through 83, and became an independent program in FY 84.
- 64 This program was combined with the "educational and cultural affairs" program in FY 77.
- 65 Appropriations for this program began in FY 76.
- 66 Public Laws 99-500 and 99-591 established the James Madison Memorial Fellowship Foundation to operate a fellowship program to encourage graduate study of the American Constitution. First year of appropriations for this program was facal year 1988.
- 67 This program was transferred to the Department of Transportation in fire, all year 1968 from the Department of Housing and Urban Development, under Reorganization Plan No. 2 of 1968
- 68 This program was established by the Juvenile Justice and Delinquency Prevention Act of 1974 to provide education and training and to provide leadership in improving correctional programs and practices in prisons. Fiscal year 1975 had large outlays because of the construction of buildings and facilities.
- 69 Appropriations for this program began in FY 70 and closed in FY 85. This program is part of the Federal-Aid Highway Act of 1970, Public Law 91-605
- 70 The Federal Aviation Administration was an independent agency, and was transferred to the Department of Transportation in fiscal year 1967
- 71 Appropriations for this program began in FY 72 No funds have been appropriated for this program since FY 82
- 72 First year of appropriations for this program was FY 70
- 73 This agency was established on July 1, 1971. This agency brings together a number of volunteer programs Some of these funds were formerly in the Office of Economic Opportunity.
- 74 These programs included the Service Learning Programs, University Year for Action, Youth Challenge Program, and the National Student Volunteer Program in fiscal year 1975. In fiscal years 1980 to 1984, programs included were the University Year for Action, Young Volunteers for Action, and National Service Learning programs. In fiscal years 1985 and 1986, the program included was the Service Learning Programs, and in fiscal years 1987 to 1989, programs included were the Literacy Corps and the Student Community Services program.

- 75 The Federal Emergency Management Agency became an agency March 25, 1979, representing a combination of about five existing agencies. The two largest were the Defense Civil Preparedness Agency in the Department of Defense and the Federal Prep -edness Agency in the General Services Administration.
- 76 First year of appropriations for this program was FY 68.
- 77 First appropriations for the "other training programs" were in the late 1980s. These programs include the Fall-Out Shelter Analysis, Blast Protection Design, and Multi-Protection Design Summer Institute. These numbers have stayed consistent because the number of participants in these programs has gone down.
- 78 This program was transferred from the General Services Administration to the National Archives and Records Administration in April 1985.
- 79 This program makes grants for the promotion of scholarly, cultural, and artistic exchanges between Japan and the United States. Appropriations for this program began in FY 76.
- 80 The National Archives and Records Administration became an independent agency in April 1985.
- 81 This program was established by the act of July 20, 1970. Public Law 91-345.
- 82 This program was established by Congress to conduct and support research and scholarships in the fields of peace, arms control, and conflict resolution. This program began operation in February 1986.
- 83 Includes Federal funds for research and development centers administered by colleges and universities. Obligation amounts are reported. FYs 88 and 89 are estimated.
- 84 Total outlays for FYs 65 and 70 include the "Research and Training" program. FY 75 includes the "National institute of Education" program. FYs 80 to 89 include outlays of the National Institute of Education and the National Center for Education Statistics ... Data not available or not applicable.

NOTE --Some data have been revised from previously published figures. To the extent possible, amounts reported represent outlays rather than obligations. Negative numbers are indicated in parentheses.

SOURCE: U.S. Department of Education, National Center for Education Statistics, compiled from data appearing in U.S. Office of Management and Budget, Budget of the U.S. Government, Appendix, fiscal years 1967 to 1990; National Science Foundation, Federal Funds for Research and Development, fiscal years 1965 to 1989; and unpublished data obtained from Federal agencies. (This table was prepared April 1989.)
